

Troubleshooting

For customers with a maintenance contract

[Log-in to the 1E Support Web portal](#) with the credentials from your maintenance contract – it provides issue tracking, product hotfixes and knowledge base articles for each product.

Before you raise a support case, we recommend you:

1. Check the list of [known issues](#) to see if the problem you are encountering is listed and if we have a remediation for it.
2. Check our [related topics section](#) to see if we have a resolution to your problem
3. Check the latest [Hotfix](#) to see if this issue is known and already addressed in an hotfix.
4. If you do not find what you want, [create a technical report](#) and [submit that together with your support case](#).

For customers evaluating Nightwatchman and Wakeup

If you are evaluating Nightwatchman and Wakeup, [contact us by email](#).

Creating a technical report

When you create your technical report, please provide us with the following details so that we can deal with your support case effectively when we look at it. Not having any these will very likely result in a longer resolution time as we will need to get in touch with you to obtain the missing files.

1. **Log files** – it must include the recorded time when the issue took place. If it does not, delete the logs and rerun the steps to replicate the issue. The table below details the log files we require:

For issues related to	Component	Log files	Log file location
Nightwatchman Management Center	Console service	<ul style="list-style-type: none">• NWM.ServiceHost.exe.log	C:\ProgramData\1E\NightWatchmanManagementCenter
	NightWatchman console	<ul style="list-style-type: none">• NWM.Console.exe.log	
	Web service	<ul style="list-style-type: none">• Webservice.log	
	Import wizard	<ul style="list-style-type: none">• ImportWizard.exe.log	
	Import scripts	<ul style="list-style-type: none">• ImportWizard_Script.log	
WakeUp Server		<ul style="list-style-type: none">• WakeupSvr.log	C:\ProgramData\1E\WakeupSvr\
1E NightWatchman Agent	Nightwatchman agent	<ul style="list-style-type: none">• NightWatchman.log	C:\ProgramData\1E\Agent\Nightwatchman\

2. **Environmental details**
 - The version of Nightwatchman Management Center you are running, including the latest patch for it
 - The version of ActiveEfficiency you are running, including the latest patch for it
 - The version of SQL you are running, including the latest patch for it
 - The name of the machines and when the issue occurred.
 - The version of the Operating System you are running, including the latest patch for it
 - The scope of the issue – did it affect a particular geographical location, group of users or client machines
3. **Configuration**
 - If there were any recent changes made to your configuration
4. **Others**
 - Self-help troubleshooting steps you carried out
 - In the event of a service crash or if you are experiencing high CPU or memory usage, provide us with the dump file, event viewer logs, traces. We will provide you with FTP details to upload these files
