

Network.SetAirplaneMode

Method	SetAirplaneMode
Module	Network
Library	Core
Action	Turn airplane mode, also known as flight mode, on or off.
Parameters	<code>Setting</code> (string): "on" indicates that airplane mode should be turned on, otherwise it is turned off.
Return values	<code>Succeeded</code> (boolean): Indicates whether the action succeeded.
Example	<pre>Network.SetAirplaneMode(Setting:"on"); Network.SetAirplaneMode(Setting:"off");</pre>
Platforms	<ul style="list-style-type: none">• Android
Notes	This is the SCALE method of controlling airplane mode on Android, since Android have deprecated programming airplane mode by a non-system app. See Network.SetWiFiMode and Network.SetBluetoothMode for details on turning those features on or off separately.
