

The Shopping Admin console

Fundamentally, you configure Shopping to provide applications that can be requested from the Shopping Web portal. When you have installed Shopping, you need to:

1. [Set up Configuration Manager sites](#)
2. [Determine access privileges for additional Shopping administrators](#)
3. [Nominating approvers and deputy approvers](#)
4. [Define User and Computer categories](#) to determine who gets to see what applications, and how approvals will work.
5. [Create and manage applications](#) (general applications, mobile specific applications, Configuration Manager applications and OS deployments)
