

Training

Summary

An introduction to Tachyon training resources, including lab guides.

Available training for Tachyon 5.0

This page provides links to the available training on Tachyon 5.0. The Operator course is the start point and is for those who need to design, install, configure and use Tachyon. The Advanced and Developer courses are for more advanced Tachyon users. To access the training follow this link and select the course relevant for you and the version required: <https://1etraining.litmos.com>. There is a Hands on Lab session available for each course and this should be taken once the on demand content has been studied.
