

Welcome

To help you get up and running quickly, we've organized the ActiveEfficiency server documentation into the following sections:

1. [Introducing ActiveEfficiency](#) – if you're new to ActiveEfficiency Server 1.10 or just want a quick refresh, we recommend you read this section to give you an insight into what it is and the companion products it supports.
2. [Implementing ActiveEfficiency](#) – everything you need to know to get it running in your environment. We talk about:
 - [Preparation](#) – the accounts and permissions you need and things to be aware of
 - [Prerequisites](#) – a definitive list of prerequisites and dependencies to take into account before you install ActiveEfficiency
 - [Installing and upgrading ActiveEfficiency](#) – how to use the wizard to install or carry out an upgrade to a later version
 - [Installing the Scout](#) – how to install the Scout and what modes to use to suit your environment
3. [Using ActiveEfficiency](#) – how to secure the ActiveEfficiency Website, set up the data capture accounts and configure the features to support its companion products
4. [Reference](#) – a list of installer properties, APIs and command-lines
5. [Release notes](#) – late breaking news for ActiveEfficiency Server 1.10
