

OS Migration

With the OS Migration feature, you can:

- [Track WSA orders](#) – view the status of Windows Servicing Assistant orders
- [Scheduling legacy OS deployments](#) – schedule OS Deployments on behalf of end users
- [Scheduled legacy OSD Requests](#) – view the status of legacy OS Deployments

Before you can schedule any OS Deployments, you need to create an OS deployment, refer to [Creating OS Deployment applications](#) for details.

To use OSD mapping rules, you must enable integration with AppClarity, refer to [Integrating with AppClarity](#) for details.
