

Implementing 1E Client

Summary

Everything you need to know about deploying 1E Client in your network. This section is structured in a way that leads you through the three phases of a typical implementation project: Design, Install, Verify

If you have Microsoft System Center Configuration Manager then [1E Client Deployment Assistant 1.5 \(CDA\)](#) is the recommended method of deploying a new installation or upgrade of the 1E Client on Windows.

In this section...

Design Considerations

Information that will help you design and plan deployment of 1E Client in your organization. Includes infrastructure dependencies for each 1E product supported by the 1E Client.

Requirements

Information that will help you design and plan the implementation of 1E Client in your organization. This includes all the prerequisites and dependencies, which are necessary to install 1E Client.

- [Common client requirements](#) — Prerequisites and dependencies that are common to all client features and modules of the 1E Client.
- [Tachyon client requirements](#) — Information that will help you design and plan the implementation of Tachyon in your organization. This includes all the prerequisites and dependencies, which are necessary to install 1E Client with Tachyon client enabled.
- [Nomad client requirements](#) — Information that will help you design and plan the implementation of Nomad in your organization. This includes all the prerequisites and dependencies, which are necessary to install 1E Client with Nomad client enabled.
- [PXE Everywhere client requirements](#) — Information that will help you design and plan the implementation of PXE Everywhere in your organization. This includes all the prerequisites and dependencies, which are necessary to install 1E Client with the PXE Everywhere Agent client module enabled.
- [Shopping client requirements](#) — Information that will help you design and plan the implementation of Shopping in your organization. This includes all the prerequisites and dependencies, which are necessary to install 1E Client with Shopping client enabled.
- [WakeUp client requirements](#) — Information that will help you design and plan the implementation of WakeUp client in your organization. This includes all the prerequisites and dependencies, which are necessary to install 1E Client with WakeUp client enabled.

Installing and upgrading

How to deploy 1E Client, including a guide to upgrading. 1E Client provides Tachyon client features and client modules for Nomad, PXE Everywhere, Shopping/WSA, and WakeUp.

- [Deploying 1E Client on Windows](#) — Guidance for deploying 1E Client onto Windows computers, including installation and uninstallation.
- [Deploying 1E Client on macOS](#) — Guidance for deploying 1E Client onto macOS devices, including installation and uninstallation. Only the Tachyon features of 1E Client are available on macOS.
- [Deploying 1E Client on Linux](#) — Guidance for deploying 1E Client onto Red Hat Enterprise Linux devices, including installation and uninstallation. Only the Tachyon features of 1E Client are available on Linux and other non-Windows OS.
- [Deploying 1E Client on Solaris](#) — Guidance for deploying 1E Client onto Solaris devices, including installation and uninstallation. Only the Tachyon features of 1E Client are available on Solaris and other non-Windows OS.
- [Upgrading to 1E Client](#) — Guidance for upgrading Tachyon and other legacy 1E agents to 1E Client. This page contains detailed steps for upgrading Tachyon Agent and a summary of considerations for upgrading other legacy agents. The 1E Client contains clients for 1E products and solutions, and their upgrade documentation should be consulted before upgrading their clients and agents.
- [Reconfiguring 1E Client](#) — The 1E Client will be installed with the configuration required at the time. After the initial installation, it may be necessary to reconfigure the 1E Client. For example, you may want to enable a module that was not enabled when the 1E Client was first installed. This page provides guidance on changing the configuration of the 1E Client after the initial installation and configuration.

Verifying

Links to other 1E product documentation to verify or troubleshoot their features that are dependent on the 1E Client.

- [Verifying Tachyon client](#) — Basic verification tests that cover a single-server installation of Tachyon Server. These tests only cover Tachyon and do not verify the configuration of 1E client modules with other 1E products.
- [Tachyon 5.1 - Verifying](#)
- [Nomad 7.0.200 - Troubleshooting](#)
- [PXE Everywhere 4.0 - Verifying](#)
- [Shopping 6.0 - Troubleshooting](#)
- [NightWatchman Enterprise 7.3 - Troubleshooting](#)
