

# AppClarity release information

## AppClarity 7.1 (Maintenance) Release Notes – last updated 07-July-2021

These notes contain late-breaking information about AppClarity that you need to have to successfully install and use the product. For the most up-to-date information please see the [online readme](#). You should read these release notes and the [online documentation](#) for AppClarity thoroughly before installing the software.

### New features in AppClarity 7.1

The AppClarity 7.1.105 maintenance release contains a number of bug fixes:

- Works with Tachyon Platform 5.2
- No features or feature changes added in this maintenance release.

The main AppClarity 7.1 release contained the following features:

- Works with Tachyon 5.1
- Windows Server OS LDC
  - New license demand for core based licensing of Windows Server OS (calculated with-in Microsoft Core LDC)
  - Compliance calculation is now based on new license demand
- Support for Currency Conversion
  - When you can set a default currency (other than USD) AppClarity now renders all reporting and financial numbers (or graphs) only in that set currency
- New UI controls
  - New UI controls have been added to improve the usability:
    - Report refresh - ability to refresh reports on individual pages, and the ability to view the status of the last report refresh
    - UI Controls - ability to choose columns as either shown or hidden on individual screens
- Installation mode change
  - AppClarity installer is now included as an app with the Tachyon installer and can be installed and maintained this way
  - Hotfixing capability
- Enhancements
  - Entitlement
    - New Active Entitlements Only toggle filter on Entitlement Summary page
    - The ability to export entitlement summary data
  - License Demand
    - Device names are now shown as hyperlinks on LDC reports
  - Compliance
    - Improved logic for rendering installs, and a new "Exempt" status on the compliance detailed table
    - Effective License Position (ELP) displayed for SQL Server components as it is for SQL Server entitlement
  - Reclaim
    - Reclaim product usage screen loading time is optimized for quick page load.
