

Using Inventory

Summary

How to use the Inventory application to view and export inventory, and manage associations.

Inventory can be reached directly using the following URL:

```
https://<tachyon DNS Name FQDN>/Tachyon/App/#/inventory
```

where <tachyon DNS Name FQDN> is the one set up during the preparation phase, as described under the heading [Preparation: DNS Names](#).

In this section...

Inventory features

The Inventory app captures data from different sources, then consolidates, normalizes and stores it in Inventory repositories.

Software Inventory

Software Inventory shows data captured from sources such as Configuration Manager, Big Fix and vCenter if you have them configured.

Hardware

Hardware Inventory shows data captured from sources such as Configuration Manager, Big Fix and vCenter if you have them configured.

Manage associations

Applications and Packages in Configuration Manager are identified by a name and optionally publisher and version arbitrarily determined by the Configuration Manager administrator that created them. The Tachyon platform uses a standard format of Vendor, Title, Version and Edition to identify applications.

The **Manage Associations** section of Inventory enables an administrator to effectively normalize the Applications and Packages imported from Configuration Manager by associating them with a Vendor, Title, Version and Edition defined in the 1E Catalog. These associations are then used to define migration rules in [Application Migration 3.1](#) and reclaim rules in [AppClarity 7.1](#).

User Summary

User Summary shows data captured from sources such as Configuration Manager, Big Fix and vCenter if you have them configured.

The 1E Catalog

An introduction to 1E Catalog and how to access and use the feature.

AI Powered Auto-curation

Describes the AI Powered Auto-curation feature that improves software inventory results.

Configuring 1E Catalog connection to 1E Cloud

Post-install configuration of 1E Catalog synchronization and AI Powered Auto-curation.

Rebuilding the 1E Catalog

Resynchronize the 1E Catalog using admin access.
