

# Using 1E Core

## Summary

How to use the 1E Core app.

The purpose of the 1E Core app is to enable 1E ServiceNow apps to leverage the capabilities of Tachyon. For example, 1E ITSM Connect allows super-fast investigation of your network environment to retrieve sets of devices that you can then run immediate actions on. 1E Core is a common component for the 1E ServiceNow apps in order to avoid duplication.
