

Nomad.CachedPkgStatus

Method	CachedPkgStatus
Module	Nomad
Library	1E
Action	Get the percentage of the specified content in the local Nomad cache.
Parameters	<code>ContentId</code> (string): The ID of the content to query.
Return values	<code>Percent</code> (float): The percentage of the content cached on the named device. <code>ContentVersion</code> (int): The version of the content on the named device.
Example	What percentage and version of content "Content_7f368e5f-4dbe-4027-ba81-c5463e372a0c" is in the local Nomad cache, if any? <pre>Nomad.CachedPkgStatus(ContentId : "Content_7f368e5f-4dbe-4027-ba81-c5463e372a0c");</pre>
Platforms	<ul style="list-style-type: none">Windows
Notes	No data is returned if the device does not have the requested content. "Pkg" appears in the method name for historical reasons - the method works for any content in a Nomad cache. See also RunPkgStatusRequest .
